IDEGO practical ownership of an AI product

40% shorter report generation

2 live Veldia and Impolska

Experience

2024-2026

AI Native Developer Intern

Apr 2026-present

IDEGO

- Took practical ownership of an AI product, coordinating team contributions and taking responsibility for coherent delivery, quality and security.
- Build backend services, web features and developer workflows with Codex and Claude Code.
- Use coding agents for repository research, implementation, refactoring, debugging, tests and documentation, with review and verification built into the process.
- Turn unclear tickets into scoped plans, working prototypes and PR-ready changes.

RPA Intern

Aug 2025-Sep 2025

DOVISTA Polska

- Mapped the process with stakeholders, then built and deployed a UiPath robot for an SAP-related reporting workflow.
- Cut report generation time by **40%** and reduced manual data-entry risk.
- Used Document Understanding/OCR and produced a management demo.

Junior Recruiter

Nov 2024-Jan 2026

4Specialist, Gdańsk

Standardized driver-document verification and reduced correction loops through consistent rules, documentation and communication.

Profile

Early-career developer with commercial experience across AI-assisted development, automation and product engineering. Best fit: AI Native Developer, AI Automation Developer, Junior+ Product Engineer and Internal Tools Developer.

Technical core

AI DEVELOPMENT

Codex, Claude Code, agentic coding, spec-driven development, TDD, LLM workflows

WEB

TypeScript, React, React Router, Astro, Node.js, REST APIs, Cloudflare Workers

AUTOMATION

UiPath, Make.com, n8n, webhooks, SAP, OCR, API integrations

FOUNDATION

Git/GitHub, MongoDB, SQL basics, Docker, Linux, JSON

Education

Computer Science and Econometrics

University of Gdańsk
2024-present, expected 2027

Languages

Polish: native
English: C1

Work you can open.

sacewi.cz

01

Veldia

veldia.pl

Mobile-first SaaS/PWA for small shift-based teams.

- Schedules, work hours, availability, time off, roles, multiple locations and Web Push.
- AI-assisted schedule drafting with manager review and publication.
- End-to-end product work: UX, onboarding, demo, pricing, 30-day trial, billing, legal flows, SEO and conversion.

Astro 5 / React / PWA / Supabase / Cloudflare

02

llmpolska

llmpolska.pl

Polish AI community, tools and education platform.

- Frontend, backend and deployment built around React Router and Cloudflare Workers.
- Community, AI tool discovery, educational content and an AI helper workflow.
- Positioning, brand, landing pages and product distribution.

React Router 7 / Cloudflare Workers

03

Portfolio website

sacewi.cz

Bilingual React/Vite portfolio with GSAP, local fonts, HLS/video case studies and reduced-motion support.

04

Smart Notifications

[automation](#)

Make.com workflow connecting weather, Google Calendar and Discord through APIs, webhooks and JSON.

01

Clarify the problem

User, goal, constraints and the first behavior that needs to work.

02

Build from a spec

Spec, test-first slice, implementation and agent-assisted review.

03

Verify and improve

Tests, review, feedback, fix loop and a clear PR.

I build with AI and deliver through scope, code, tests and review.
